## Summary

These funnels are designed to facilitate easy, fast, and clean transfer of water-based or plastic bead ammunition.

[Toys & Games](#) > [Outdoor Toys](#)

These funnels are designed to facilitate easy, fast, and clean transfer of water-based or plastic bead ammunition for model firearms. The spout on the base funnel was designed for the magazine of the Hydro Strike Pulsar Pro blaster by Prime Time Toys, but the adapters increase compatibility to include Splat-R-Ball and Gel Blaster equivalent hoppers. New adapters can be easily modeled based on the dimensions of the base funnel's output nozzle.

The inside diameter of the input opening can easily accept container sizes up to around 45mm, at which point the funnel collar will create a very tight fit.
