### Summary

Christmas bauble, no supports needed. Can hold name, photo, etc.

---

[Seasonal designs](#) > [Winter & Christmas & New Year's](#)

---

A simple open bauble that can hold a name, photo, etc.

Split into several parts, no supports needed. Print with 0.2mm layer height for best fit.

Print 8 copies of “ribs”, and 1 copy of everything else. It's a normal fit, and I used superglue to hold the pieces together.

For our Christmas tree, I put the names of my grandchildren into the baubles so they can “find” themselves on the tree. Or you can put a small photo or some other figurine insight.

To provide you with the option to modify this basic design whichever way you like, I uploaded STEP and Fusion 360 .f3d files.

**If you like what I'm doing...**
