Summary

I saw a model in an XRP frame and I wanted to take it to the next level

I saw the frame of the xrp models and I recently saw a cool model, which I will link in, which was a flare xrp battlebot. It was an xrp frame with a wedge to flip over the opponent. I thought it would be cool to add some more flare, but without the battle, so I "Voronized" it. I also saw that the model that I am remixing now had a turret. I was stocked. Then I saw that it was not an actual turret. So I added one! Print With supports.

Print tips
