There are lots of T nuts for M3, M4, M5, M6 but I needed M2 so I created these. Intended to be printed sideways. It should be easy to hack the scad files for other nut sizes. The sliding version has not been tested but should be fine as it is generated from the same scad profile. I really just needed the rotating version with post for my temporary light bar, but I had to make the others along the way.

### Print Settings

#### Printer Brand:
