Summary

remixed a small but effective sorting tray to add holes for heat inserts to bolt together and added alternate dividers.

This is a remix of a lego sorter that I recognized I needed multiples, and different configurations of dividers for my lego sorting needs. I added holes for application of heat inserts and bolts so these trays can be put together in multiple ways, and hacked the dividers up a bit to provide 1 large tray and one tray with just a single divider, to give some options, while recognizing that I also needed to reinforce the areas where heat insterts will be applied. Far from perfect, but effective.

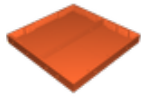

This remix is based on
