Goal was to create a replacement bezel for an ancient Flik-Flak Spiderman watch from Switzerland. The watch is something like this model:

<https://www.flikflak.com/en-us/spider-man-in-action-flsp012/FLSP012.html>

Printed in PETG at 0.1mm layer height with a standard 0.4mm diameter nozzle.

The v1 model is the skinny one in the second photo, and the v5 model covers the entire outer ring of the watch face. Both versions snap into place around the watch face, but can be pried off with a fingernail.

Included the parametric Fusion model so you can edit as necessary.
