Summary

These are replacement feet for the Ghost Fire Guitar Pedal Board that are extra tall.

Tags: [guitar](#) [pedal](#) [pedalboard](#)

I made these tall replacement feet to give more clearance under the pedal board so the switch on my power supply wouldn't be too close to the ground. These feet add about 30mm of clearance under the board.

TPU is the best material to print these in but they should work in other materials. I printed it with the bottom up and support so the chamfer on the bottom would come out clean

infill - 50%
layer height - .2
