Simple planter with a few branches / grass - ornaments.

Update 2022/01/27: I've added a shelled version for people that don't want to print it in vase mode. Like with my newer exports you're getting now exports in various resolutions too. Additional I've added some 3mf files with an example configuration for spiral vase mode. I haven't tested it but it should be conservative enough to work.

If you like this, you might want to check out my other pots and platers, too:

Print instructions - Vase mode (not tested, should work)

Layers and perimeters

Speed

Advanced

Filament: Das Filament PETG Maisgelb - Corn yellow

Notes:

I've printed it in vase mode with a 0.8mm nozzle. Very rigid result.
