### Summary

Magnetic Logo Plate to fit over the embossed logo and text on the ASUS 502 Case

Tags: [logo](#) [gaming](#) [computer](#) [asus](#) [tuf](#)

I bought a new ASUS TUF 502 gaming case, it has the TUF logo and some text embossed on the front and it is not easy to see which I think is the point. However I wanted to make it stand out more so I designed a magnetic plate that fits over the embossing and brings out the TUF logo and text.

These are the magnets I used in the build, I put a drop of super glue in each cut out for the magnets so they would stay with the cover.

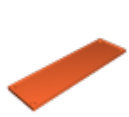

Magnets 6x3mm you can find them on Amazon

Filament

Sunlu PLA+ Black

Inland PLA+ Gold
