Simple planter with a few branches / grass - ornaments.

Update 2022/01/27: I've added a shelled version for people that don't want to print it in vase mode. Like with my newer exports you're getting now exports in various resolutions too. Additional I've added some 3mf files with an example configuration for spiral vase mode. I haven't tested it but it should be conservative enough to work.

Because this little thing reached 1000 downloads I created a multicolored version. You can find them here:

Filament: Das Filament PETG Maisgelb - Corn yellow

Notes:

I've printed it in vase mode with a 0.8mm nozzle. Very rigid result.
