Let me introduce you to my Mountain Business Cards Holder, a mountain-shaped business card holder that combines functionality and design. Measuring 20 cm in width, 15 cm in height, and 5 cm in depth, it comfortably holds a standard pack of business cards sized 8.5 x 5.5 cm.

The snow on the mountain's peak is not just an aesthetic detail; it also serves as a practical lid for the box. Additionally, it features three transverse slots that allow for elegant display of business cards, making them always ready to be grabbed.

To ensure the lid stays securely in place, there are four holes for small 5 x 2.5 mm magnets between the body of the mountain and the snow, keeping your cards protected and safe. Beyond its functionality, the Mountain Business Cards Holder is also a modern decoration for your desk or office, adding a touch of originality and sophistication to your workspace.

To create it, use PLA with a 0.4 mm nozzle, set the layers to 0.2 mm, and an infill of 10% gyroid. No supports are needed for this print. Choose the Mountain Business Cards Holder to combine practicality and style in a single, elegant accessory.

This free model contains the Sparks3D logo. If you want a model without branding for personal or commercial use, please subscribe to a support plan on my [Printables](#) account. Thank you.
