Tags: [longboard](#) [skateboard](#) [longboarding](#) [skateboarding](#)

Replaces the top of broken plug bushings (remove the broken plug top and insert this ring) or simply when you want to reduce the slop in your Bear's when using non-plug bushings.

Important: This must be printed in TPU filament (hardness 93A/95A) to allow for movement of the kingpin in the bushing seat. Insert rings made out of hard materials like PLA will break.
