

Hexagonal Hot Wheels Shelf

Gray Muller

[VIEW IN BROWSER](#)

updated 29. 5. 2025 | published 29. 5. 2025

Summary

Each shelf module can hold 10 cars and can be held to the wall by medium command strips or screws.

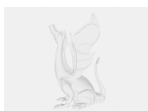

[Art & Design](#) > [Wall-mounted](#)

It is able to be printed on a standard ender 3 bed. If you decide to remix it, even on other platforms, please give credit. From my experience, this model prints very well in PLA and Bambu Lab PETG HF but has some difficulties with the walls in Polymaker PETG and difficulties at the joints in Bambu Lab ABS.
