updated 2. 7. 2024 | published 2. 7. 2024

Summary

These pannels are an improved version of Nadir's ones.

[3D Printers](#) > [Other Printer Parts & Upgrades](#)

Copied the design from the official pannels, used Nadir's measures as a base.

There is a version with larger holes, to add TPU washers to the bolts.

BOM

1 unit of each pannel

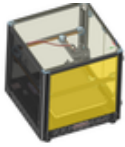

39 M3x8 bolts

39 washers, if you opt for this version (perferably printed in TPU)

Don't forget to add the **doors**!

Thankyou Nadir for the great work.
