Summary

A nice cable holder with a bucket for the charger in the middle. Made for my Anker 735 charger and 10ft braided cable.

Originally made it just to hold my Anker 735 charger, but I also changed the bucket to fit a 60mm-60mm-90mm charger in theory. I haven't tested the larger bucket. Has a notch in the top shelf to hold the cable for the first loop. Prints flat on the back and tree supports recommended.
