### Summary

Stores up to 6 steel sheets for Prusa XL

---

[3D Printers](#) > [Prusa Parts & Upgrades](#)

---

Here is a remix of [Phillip Rater's BambuLab print plate storage](#). I extended the length to fit the larger Prusa XL steel sheets, increased the capacity from 2 to 6. The base width is similar to [Zhollis21's Improved Prusa Steel Sheet Holder](#) but holds 4 more sheets.

For added stability, less vibration, and to keep the steel plates from flexing or hitting each other, I made a sheet separator divider.

I printed it at 40% infill for some heft with supports.

When importing XL Print Plate Holder in Prusa Slicer, I load the file as a single object having multiple parts and the file loads how it is supposed to look.
