Remix of Space's excellent "LilyGo T-Echo Backplate Bracket" model, adding a baseplate, and 1/4" tripod mounts (on both the baseplate and backplate). Tripod mounts mount flush, so the bracket will continue to sit flat.

Hardware:

2x M3 10mm screws (same requirement as original model)

2x 1/4" hexagonal jam nuts (20 threads per inch; compatible with most tripods)

===

Pair with [World's Longest Selfie Stick \(Camera Mop Adapter\)](#) to mount on top of a telescopic window cleaning handle for a makeshift antenna mast (final pictures).
