The only difference between this model and the original is that the vacuum side is slightly smaller and has ribs around the inside. It is based on the **R18TR-Hilti_VC20_40_60.stl** file with the new part making the fit smaller.

I printed the model with X-PLA Power Tool Lime Green from add:north on a Prusa MK4.

With the router I have (a RTR18 W 38 Y 2022) the adapter doesn't slide all the way in due to the spindle lock button being slightly in the way. I just removed the button since you can lock the spindle by inserting something suitable and long and roundish, like an Allen key.

This remix is based on
