Summary

This is a custom MGN9H mount for a Voron Stealthburner toolhead for the Ender 3 S1 CoreXZ mod.

Tags: [mgn9h](#) [stealthburner](#) [ender3s1](#) [corexz](#)

I have upgraded my [Ender 3 S1 to CoreXZ](#) and used an MGN9H linear rail for the X-axis. I created a generic mount and an adaptor for a Voron Stealthburner toolhead.

There is also an example of an inductive probe mount.

I have provided the STEP file so it can be used for printing or modified for your use.
