Tags: [cablemanagement](#) [ender5pro](#)

It's simple idea for people who doesn't need whole drag chain system - limiter for cables not to go under X axis stepper during autohome.

Bottom (looking at printing position) edges are rounded because when you turn it upside down to mount it to your printer, cables will rub it.

You can simply mount it on the top of X axis stepper, should fit and not be loose.

Printed on Pollyterra PLA, no supp needed.
Enjoy!
