updated 1. 7. 2024 | published 1. 7. 2024

Summary

Just a simple base to allow the flamingo uploaded by @LeviLEVI_1454239 to stand on it's own.

Tags: [stand](#) [base](#) [flamingo](#)

I printed a few of the original flamingos as table decorations for a birthday party my wife was coordinating at work. The model will not stand by itself (note, it was never stated that it would). This base will snap into place with the extended foot, no glue needed for me but may still be used if yours doesn't fit properly.

I printed my base with fuzzy skin in an attempt to mimic sand.
