This fishing “tackle box” is setup in a cylindrical shape with compartments of different sizes, and a screw-on top that uses a mason jar style thread for an easy print that operates nice and smooth. As designed, the container is just under 12 cm in diameter and 3 cm tall.

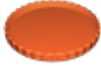

No supports are required, and two different versions of the “top” are provided. The “Top Smooth” version is an easy print in a single color. Also included though is a “Top with Fish” 3MF file, which contains the separate bodies needed to print the version with the fish decal on the top (which requires an MMU or AMS to print).

The SVG for the cute fish and hook sketch came from: <https://freesvg.org/>
