### Summary

A star Christmas tree topper with an interesting lattice pattern. I printed mine in a gold pla & love the way it look

A star Christmas tree topper with an interesting lattice pattern. I wanted to create something more interesting after seeing many bland and boring options at our local store. It was a challenge for myself and the printer to create this lattice patter. I printed mine in a gold pla & love the way it look

Printed at 0.15 layer height

I added supports from the build plate, and a support enforcer along the middle start shape.

If people ant the .3md file let me know and I can slice it again.

All the best, Happy Holidays and Merry Christmas!
