Summary

An easy to print case for your Mevo Start that comes with a built in cold shoe. Protect your camera from the elements!

[Sports & Outdoor](#) > [Outdoor Sports](#)

I have all of my kids sports games on video from this summer **except** for the ones in a light rain. So here's a case that will protect your Mevo Start from the rain and gives a handy cold shoe to mount microphones, etc.

Print in PETG for additional heat resistance. 2 M3 nuts and 2 M3x8mm bolts are required for assembly.

Pelican has a case that this combination camera, case, and shotgun mic fits in nicely:

Or, for added nerd cred, print your own case! The [SBOX](#) is still my favorite on Printables:

If you end up using the case, let me know your thoughts! The cold shoe on this shotgun mic fits a bit tighter than my other mic setup. Happy to share a few different models if you find it is too tight/loose. Fusion360 source included!
