The original paperboard fish chevrons don't work well with 3D Catan tiles, so I whipped up this amalgamation of mathgrrl's Catan numbers (<http://www.thingiverse.com/thing:239439>) and cerberus333's "Fish for a desk" (<http://www.thingiverse.com/thing:229514>).

Two of each numbered fish are needed to replace a single paperboard chevron.
