Tags: [creality](#) [duct](#) [ventilation](#) [vent](#) [ducting](#) [k1](#) [k1c](#)

A remix of tlamp's 4" vent adapter, this version features a shorter funnel but retains a wide recessed band for securely attaching ducting/vent hose to it. Snaps straight into the air filter slot, no screws required.

Original model is plain, second model includes a "top" marker to aid insertion.

Printed in PETG with tree supports (build plate only) and no brim. Infill not really required but printer was set to 15% Gyroid infill.

This remix is based on
