[ryobilink](#)

This bin has a reduced wall height so you can still get things in/out of it when another bin or a shelf is mounted directly above.

This bin is wider than a normal bin on one side, use the extra space at the end of a Link rail or to fill a gap.

Suggest printing in PETG because garages can get hot. Pictured using **OVERTURE PETG Grass Green** which is very close to Ryobi green.
