Summary

Phone mount for toptube with bottle cage style mounting screws

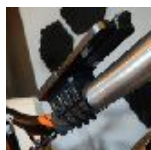

[Sports & Outdoor](#) > [Outdoor Sports](#)

Mounting shell for Pixel4a with a slim Spigen case. Needs to be glued to the mounting spacer. Finger print sensor is still accessible.

The top clip broke off easily in my first version, so I included a repair clip. Have not tested the current version longterm yet.

Printed in ABS on Ultimaker 3. Needed to modify it to be able to mount the phone on my bicycle. Picture does not show the latest version.
