## Summary

A simple locking latch for the 16oz McKay Can Crusher that fails to stay upright.

This simple designed latch helps keep the arm on a failing McKay 16 oz can crusher upright. I got sick of our McKay can crusher arm randomly falling down and smacking the wall. This latch fixes the primary design flaw and has just enough plastic to keep the arm locked upright. To operate the arm, simply pinch the two tabs on the latch to free it and pinch them again to secure it.
