Summary

Easy print holder, with steep arms, designed for razor, but can work for other objects.

[Household](#) > [Bathroom](#)

Tags: [razorholder](#) [bathroomaccessories](#) [multiboard](#)

The razor holder I found were not steep enough and the razor slipped out too easily.

This design has steeper arms and fits all the razors I could find.

Follow multiboard.io instructions (three outer layers, 15% infill).
