---

This is the building from the map [Gwel's High Building](#) in Teardown.

I created this with the permission of the maps creator Gwel and i give full credit to him for designing the building.

This model **is not** a 1 to 1 building but it's built to a scale.

The printability of this model is not the best, i tried to make it better and i have spend close to or over 6 hours on this model, **maybe** i'll create more maps or not, maybe i'll make this better or not. It's printable without supports to an extent but i **do not** guarantee that it's gonna print properly without supports.

The design that has the best printability is the one called: "Gwel-high-building\_no-vents\_base\_no-logo" or "Gwel-high-building\_no-vents\_no-base\_no-logo"

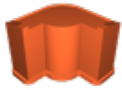

If you own Teardown and want to play some great maps i recommend [Gwel's maps](#).
