I've just finished a project that I've been working on for the past few days - creating an insert for Ezra and Nehemiah.

I've had the game for about a month now and I've been really enjoying it, otherwise I wouldn't have even considered getting into this. The fact that they managed to create a game with this theme that I'm happy with both the mechanics, the art, and the implementation of the theme, and that it seems to have international appeal - it seems like the stars truly aligned for this one.

In the case of Ezra and Nehemiah, what was pushing me was the box itself - standard for Garphill games, but much smaller, denser, and more crammed than average. Putting everything back in the box was not an easy task and a bit frustrating.

The player pieces and blessing all fit together in the same bins (as a bonus with fancy Hebrew letters for A to D) everything fits in the box VERY

SNUGLY and I even managed to find a place for the horn (Shofar) I printed as a first player token.

The files are available on the website for anyone who wants to print them. Feel free to share, like or comment, here or on BGG.

I printed everything at 0.2 resolution.
