updated 1. 7. 2024 | published 1. 7. 2024

Summary

These files include a handle, lid / dust cover, and stand for a 5u 68hp build of Jinja's amazing eurorack case.

These accessories should be fairly universal except for the lid. I designed the lid for my 5u case, which uses the 4u print and a customized 1u print I created by simply cutting the middle out of the 4u model. I'm not going to post that, as it includes too much of Jinja's work.

Everything assembles with m3x6mm screws and m3x4mm heatset inserts (only needed for the lid). The TPU pads on the stand and lid get glued in using CA glue (super glue). I highly recommend wiping down the TPU with rubbing alcohol to make it a bit more grippy.

Cover

6 files

lid-left-segment-26hp-5u.stl

☐ Assembles with M3x6mm screws and M3x4mm heat set inserts

lid-right-segment-26hp-5u.stl

☐ Assembles with M3x6mm screws and M3x4mm heat set inserts

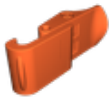

lid-middle-segment-16hp-5u.stl

☐ Assembles with M3x6mm screws and M3x4mm heat set inserts

latch-hasps.stl

☐ Put an M3x35mm screw through this for the latch to grip on to

sbbox_latch_front_v2.stl

☐ These are designed by Michal Fanta - <https://www.printables.com/model/511673-sbox-for-mk234-do>

tpu-side-pad-print-2.stl

☐ These go inside the lid to give it a better grip on the case. Print on mirrored

Stand

7 files

eurorack-stand-cross-bar-upper.stl

☐ slightly asymmetrical to make it tension fit in place. If it falls out, flip it over.

eurorack-stand-foot-print-four-tpu.stl

☐ Print in TPU, glue onto the bottom fo the stand for traction.

eurorack-stand-backpad-print-two.stl

☐ Print in TPU, glue into stand

eurorack-stand-bottom-pad-print-two.stl

☐ Print in TPU, glue into stand

stand-side-left.stl

stand-side-right.stl

eurorack-stand-cross-bar-lower.stl

carry-handle.stl

☐ attaches with M3 screws and square nuts
