This is a simple remote holder for four remotes. There are already a lot on this site but not for the random remotes I had lying around so I made this set of one larger slot and three smaller slots.

The smaller slots are 18 mm by 55 mm and the larger slot is 35 mm by 55 mm. The larger height is about 65 mm and the smaller height is about 45 mm.

Print it in the orientation the stl comes in on it's side with no supports. The bridges worked fine with 0.2 mm layer height.
