Summary

Christmas tree Table decoration with a lights, easy print no supports
170mm tall when assembled

[Seasonal designs](#) > [Winter & Christmas & New Year's](#)

Christmas tree table decoration which will need additional Wine Bottles String Lights, FairyDecor Micro Artificial Cork Copper Wire Starry Fairy Lights, Battery Operated Light.

No supports are required during printing, however the star has base of 1 layer thick which requires pulling of carefully so not to break the star. Recommended layer height 0.2mm. Best materials are translucent so the lights show through.

The different parts can be printed in different colours and then screwed together with the led lights being fed through all the tree pieces and inserted into the start and then roughly placed in each part as screwed together. Once completed the orientation of the switch is required to match the hole in the base to enable it to be turned on and off without removing the base.
