Figurine stand/holder for original paper Karak board game figurines. I made this because there are 3D printed inserts for this board game that are awesome, yet original stands don't fit in them (seems like Karak got updated stands that are bigger nowadays). I had to make my own so it fits [this insert](#) and [this add-on insert](#). You can see it fits both on uploaded images.

I have printed it using Prusament PLA and ironed top surface to nicer finish. I have used 0.2mm layers, 0.4mm nozzle and 100% infill (because without it my slicer would have added one layer of infill which is kinda not serving any purpose). If your paper figureines don't fit, you can try scaling a bit to fit them better. It fits mine that are completely new fresh from the box.
