Summary

Bambu Lab A1 Series - Toolhead Cable Guide

[3D Printers](#) > [Bambu Lab Parts & Upgrades](#)

BEFORE STARTING THE IMPLEMENTATION OF THE PROJECT, READ CAREFULLY THE ENTIRE DESCRIPTION AND VIEW THE PHOTO GALLERY !!!

Hello Everyone

I designed a cable guide coming out of the print head. Thanks to this small modification, the cable does not kink and when using my other two projects "**Bambu Lab A1 Mini - X-Axis Cable Guide**" and "**Bambu Lab A1 Series - PTFE & Cable Clip**" that create a complete cable guide system. Thanks to which the soft silicone cable does not hang limply and does not get tangled in the Z axis when printing larger elements. Below you will find links to these projects.

The Bambu Lab logo is hidden in the first layer. If you do not color it, it will not be printed and will not be visible. You can download the **STL** file that needs to be colored and the **3MF** file that is ready to print and is in color (Just change the filament to Your color).

When you complete the project, please share a photo and a comment. Thank you and have a nice day.

Here you will find all my modifications and accessories for Bambu Lab A1 Series printers : <https://www.printables.com/pl/@Damian27/collections/1547024>

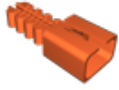

For all modifications of my Bambu Lab A1-Mini printers, I used Fiberlogy Easy PLA and Fiberlogy Impact PLA filaments in Gray and Graphite colors. As you can see in the photos, the color is almost 100% consistent with the color of the printer, which makes the modifications look like factory parts.

How to Print ? :

- Material : Any
- Layer Height : 0.2mm
- Infill : 30%
- Wall Loops : 2
- Bottom Layers : 4
- Top Layers : 4
- Support : **YES - Tree Manual - See Photo Gallery**
- Brim : No
- Brim Auto : No (**Be sure to disable Brim Auto. When printing in color with Brim Auto on, it may cause a problem on the first layer**)
