Be kind and give others a heads-up (or warning) on your coffee status with this 3D Reversible Coffee Status Sign Set. The simple base comes with four different 2-sided sign variations you can choose from- one side for when coffee is full and one side to warn others when you are in need of caffeine.

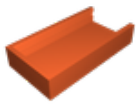

Add magnets and hang on the fridge, filing cabinet or cubicle- or just sit it on your desk or workspace.

UPDATED:

New files added with each of the 4 signs split in half for flat printing. This allows for better printing of the text with less supports and for printing the text and 3d elements in color if desired. The halves each include shallow holes and small dowels to aid in gluing them back together after printing. Dowels print well with 5mm brim.

Original whole signs are still provided and should be printed upright with tree supports.
