updated 2. 7. 2024 | published 2. 7. 2024

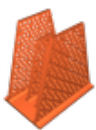

### Summary

A parametrizable vertical stand for laptops and tablets. Supports easy colorization to add glow in the dark edges.

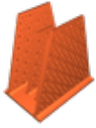

[Gadgets](#) > [Portable Devices](#)

The included .stl is for a stand with 3 slots suitably sized for e.g. a 16 inch laptop or large tablet. The .scad files can be used to vary many of the parameters. The .3mf proposes a multi-material arrangement that can be used to outline the edges in a different material — I find glow in the dark material convenient to put away a laptop without having to turn on the light,
