Summary

Wall Control version of Daryl C's mount

[Hobby & Makers](#) > [Tools](#)

Daryl C's mount was exactly what I was looking for but I wanted to use it on Wall Control so I remixed to fit a 3x6 DDD Wall Control centerpiece. I printed on the back with painted on supports on the tabs and the upper half of the arms. No supports are needed for the lock threads in my experience. Did 4 perimeters and 20% infill in PLA+ and it seems sturdy.

This remix is based on
