Summary

just my firts desing, selfwatering planter with enough espace for a cellphone

[Household](#) > [Office](#)

My first design

Truth be told, I didn't know what I was doing when I started using Fusion 360 for this design. I didn't have a clear idea of what I wanted to create, but I think the result is simple and functional, which is what I was aiming for. The photos show the v5 version, and the one I'm uploading is the v8. I believe I've corrected all the mistakes I made in the previous versions. I'm uploading it in case someone likes it or finds it useful.
