updated 2. 7. 2024 | published 2. 7. 2024

## Summary

Reworked a remix of Doug's original with a few tweaks

[Hobby & Makers](#) > [Tools](#)

Tags: [quickdisconnect](#) [kinematic](#) [lowrider3](#)

PLA. Printed as oriented. 30% infill. No Supports needed.

Used a remix of Doug's original Kinematic design and added a finger pad to the base and a tab for pulling to the tool mounting piece. Useful in overcoming the magnet and separating the two pieces with a snapping your finger type of motion.

## This remix is based on

**LowRider v3 CNC - KINEMATIC Tool-less Quick-Change Accessory Holder - supports laser, drag knife, pen, etc (v4.1)**

by Doug Joseph (design8studio)

## Modified mounts for Doug's kinematic LR3 accessory holder

by Jamie
