Hello everyone :)

Attention **SKODA** fans. I have designed a very cool **string art** stand with **SKODA LOGO** for you.

Both the stand and the Skoda string art are very easy to print and use very little filament.

The principle behind it:

- The printer pulls threads from one side to the other (so-called bridges)
- With each additional layer, the construction becomes a little more stable, this is because the individual threads support each other

- If you now lay the threads cleverly on top of each other, the result is an image

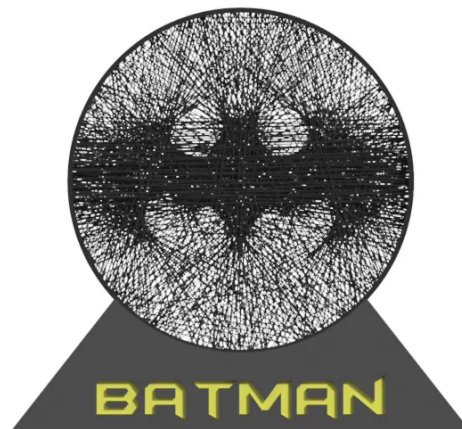

We have also published other string art designs:

- You can find them here: https://www.printables.com/de/@sektor7_studios/collections/1537106

For example Venom: <https://www.printables.com/de/model/925597-venom-string-art-marvel-comics>

For example Batman: <https://www.printables.com/de/model/925591-batman-string-art-dc-universe-comics>

Support us on Patreon to access exclusive content and be the first to see our new projects. Your support enables us to keep creating innovative and practical designs for makers everywhere:
