Hi, once again a model for the Playmobil luxury villa - the Hauser family's large house.

The staircase fits on a wall with a height of 164 mm and is in 2 parts. The stairs can be printed as a whole with cabinet or all individually.

This saved time and some filament a la Supports normal or tree.

The cupboard fits exactly under these stairs and can be glued on or used for other purposes.

I printed the model with the Bambu Lab P1S AMS and filament Bambu Lab PLA white with standard settings, 0.4 mm nossel and tree supports in the Bambu Studio.

I'm still a beginner in 3D modeling and 3D printing.
