Summary

Please like the upload if you enjoy! Lightweight battery holder for Emax Tinyhawk II 2 Freestyle. Dont worry very stiff!

[Hobby & Makers](#) > [RC & Robotics](#)

Please like the upload if you enjoy!! This is what allows me to upload more awesome designs!!

This is a Lightweight (1 gram) but wider battery holder for the Emax Tinyhawk II Freestyle.

You will need a wider battery holder if you are using bigger batteries, like the GNB 650mAh Lipo's.

Dont worry about the part breaking or the battery slipping above the part, it is strong enough even at only 1 gram!!

I recommend these slicer settings:

- Top/Bottom Surface Skin Layers: **2**
- Infill: **20%**
- Supports: **None**
