## Summary

Samsung top loader Washing machine Roller, embedded in the movable plastic agitator of the machine

[Hobby & Makers](#) > [Mechanical Parts](#)

Tags: [roller](#) [side](#) [machine](#) [washing](#) [pins](#) [with](#)

This Roller is used inside the washing bay agitator which comes into contact with clothing being washed. It has 2 side mounting pins with measurements of 11.5mm and 6mm.

To fit the roller, you need to remove the small centre cover, and remove the bolt holding the agitator down. Remove the agitator, and replace the roller on the bottom of the agitator by unscrewing the 2 x phillips head screws, which lock the side pins in place.

I printed it in PETG with a 25% infill, as the side pins are subjected to stress. Requires normal supports.
