Tags: [duplo](#) [legoduplo](#) [duplocompatible](#) [binabo](#)

Now you can combine Binabo and Duplo. It's a perfect match! Use Binabo to add some organic structures to your Duplo Projects like leaves on a tree or tunnels and spheres. Binabo fits surprisingly well into the Duplo grid.

Material

Best printed with a somewhat flexible material that doesn't break like TPU. Especially if you want to give it to kids for playing.

Types

Round

The "round" version prints well without support. Matching columns **can be printed** or get some original **Duplo design 98225** parts.

Half

The "half" version needs some support. I prefer this version of the adapter because it's very generic and flexible.

Vertical

The vertical adapter needs support any way you print it.
