The Ice Cream Leveler is designed to smooth the surface of ice cream before returning it to the freezer, as recommended by the manufacturer Ninja. After using your ice cream maker, simply use the Ice Cream Leveler to create a flat, even surface on the ice cream. This ensures the ice cream stays harmonized, making it easier for the machine to work efficiently the next time you use it.

Category: Kitchen & Dining

Compatible with NC500 & NC501

Edit 05/07/24 : diameter decreased from 101mm to 97mm
