### Summary

Golf ball grabber and cart clip made from TPU - No need to get out of the cart to pick up your mulligan.

[Gadgets](#) > [Other Gadgets](#)

Tags: [golf](#) [golfball](#) [golfballretriever](#)

Printed on a Prusa Mini (with Bondtech extruder) using Flexfill 98 (TPU ok too)

Print with supports. Use a heat gun to pull the arms of the grabber in a bit so that it holds the ball firmly.

Grabber is installed on a steel shaft that I took from an old junk club. Cut the head off and glued a drywall anchor into the end of the shaft with Goop adhesive then screwed the grabber down once the glue had set.

The cart clip is made to grip a standard steel shaft but will work with composites.

Clip fits the frame that holds the windshield/roof on standard golf carts. Been used on Yamaha and E-Z go carts.

Big fan of the Beerware license.
