Summary

Shachihoko are carp/dragon chimeras that are meant to protect wooden structures in Japanese folklore

[shachihoko](#)

An easily printable model of a shachihoko, a carp statue usually placed in pairs on the rooftops of traditional Japanese wooden structures. Meant to protect from fire, as they believed Shachihoko controls water and rain.

Model prints easily and mostly hollow with 15% Lightning infill, which makes for a rather quick print.
